

JEFFREY VARGA

Corvallis, OR - (541) 404-4052 - jwvarga@me.com
Portfolio: jeffreyvarga.org

PROFESSIONAL SUMMARY

GIS Analyst experienced in municipal planning support, housing needs analysis, and applied spatial modeling for public-sector decision-making. Experienced in spatial analysis, network modeling, geospatial data management, and cartographic communication. Produces GIS outputs that translate complex datasets into actionable insights for planners, advisory committees, and stakeholders in Oregon land use contexts.

EDUCATION

Oregon State University

March 2026

B.S. Geography & Geospatial Science

B.M. Piano Performance

Certificates

Geographic Information Science Certificate --- Oregon State University

March 2026

GIS Certificate of Completion --- Southwestern Oregon Community College

June 2022

EXPERIENCE

City of Eugene

January 2026 – Present

GIS Analyst

Eugene, OR

- Built a network dataset in ArcGIS Network Analyst to evaluate service areas and accessibility related to housing needs and essential services.
- Analyzed housing, land use, and demographic datasets to support Eugene's Contextualized Housing Need analysis, synthesizing 50+ variables for citywide planning.
- Conducted network-based spatial analyses of housing conditions and development opportunity areas using ArcGIS Pro, informing municipal planning decisions and future growth scenarios.
- Presented technical findings, maps, and housing analysis updates at public technical advisory committee meetings, supporting stakeholder review and planning decisions.
- Performed quality control and spatial verification of historical records using SQL and GIS tools, improving data accuracy and consistency for 200+ records in the City of Eugene's Cultural Resources database.

Oregon Department of Fish and Wildlife

June 2022 – August 2022

GIS Internship

Coquille, OR

- Developed a high-resolution 3D model of the historical Coquille River Basin using Blender and GIS-derived inputs, enhancing ecological education and stakeholder communication.
- Integrated spatial datasets and automated workflows using ArcGIS Pro, QGIS, and Python, creating a structured and reproducible modeling methodology.
- Presented project methodology and visualizations to a professional audience at the American Fisheries Society Oregon Chapter (2023), communicating results to 100+ attendees.

Oregon State University

September 2025 – Present

GIS & Spatial Analysis Undergraduate Learning Assistant

Corvallis, OR

- Supported GIS instruction by assisting 70+ students with ArcGIS Online and Dashboard development.
- Guided students through data preparation and Web GIS workflows using ArcGIS Pro and ArcGIS Online, enabling successful development of over twenty web-based GIS projects.
- Facilitated group work and contributed improved guidance and example materials to strengthen GIS-to-Web GIS workflow comprehension.

TECHNICAL SKILLS

- ArcGIS Pro, ArcGIS Online, ArcMap, Network Analyst, Spatial Analyst, Imagery Analyst, ModelBuilder, Dashboards, Web GIS, Cartography, Python, HTML, RStudio, Microsoft Office, Adobe Creative Cloud
